

SAFETYNET SUITE

A POWERFUL
DIGITAL APPROACH
TO DIGITAL SAFETY
& COMPLIANCE

GOVERNMENT CHALLENGES IN AN INCREASINGLY COMPLEX DIGITAL ENVIRONMENT

Mobile services and the Internet have created together a complex digital ecosystem. With the many benefits it brings to your country, this digital ecosystem also carries along many issues and risks.

Cyber attacks

Identity theft

Viruses

DDoS

Hacking

Hate propaganda

Phishing

Child pornography

While digital safety and cyber-security are everybody's business including

Individuals

Companies

Organizations

Governments have an overarching responsibility over

National security

Citizen protection

They face the increasingly difficult challenge of ensuring the compliance of this digital ecosystem with national laws and regulation as well as its economic sustainability for their countries.

THE SAFETYNET SOLUTION

Our SafetyNet suite has been designed to help you handle these challenges as a government or a regulatory body.

Through automated surveillance and real-time data, SafetyNet allows for a timely response to digital security issues and even for proactive measures, including:

Threats identification and analysis

Blocking of illicit or non-compliant Internet sites

Overall regulatory compliance monitoring

Digital identity governance

Mobile identity governance

EFFECTIVELY ADDRESSES YOUR DIGITAL CHALLENGES using cutting-edge digital tools in compliance with privacy laws.
