Data Services Metrics And Oversight Solution

Revenue Erosion And Overall Impact Of Mobile Internet

Today, people mostly use their device to access a wide range of mobile Internet services and applications provided by over-the-top (OTT) providers.

These internet giants often provide Internet-based telecom services at no charge and tax-free, which has an adverse impact on the revenue of most governments, particularly those of emerging countries.

THE GROWING SHIFT FROM VOICE TO DATA SERVICES ALSO POSES A NUMBER of regulatory challenges to telecom authorities.

A POWERFUL DATA SOLUTION FOR DATA SERVICES OVERSIGHT

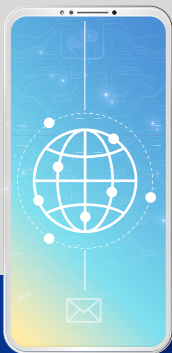

A **clear and comprehensive view of the real situation** is the very first step towards an effective regulation of data and OTT services in your country.

Visio Data, a powerful mobile broadband reporting and measurement solution, allows for evidence-based and data-supported regulation and policy-making. It also includes functionalities to track and measure specific taxes or levies to be collected on data and OTT services.

VISIO DATA DELIVERS **FULL DATA SERVICE METRICS**,
ALONG WITH **ACTIONABLE INFORMATION**, TO **ENFORCE COMPLIANCE**
WITH YOUR **LAWS AND REGULATIONS**.

VISIO DATA TRACK RECORD

Visio Data has been implemented in **several countries**, where it **currently processes** a daily average of nearly

75 million
data sessions.
