The impact of Non-compliant Devices on Revenue and Security

The number of **unique mobile subscriptions** is expected to reach nearly **6 billion by 2025**.

This creates an **ever-expanding mobile ecosystem** that **connects billions of devices** with each other and the Internet.

UNFORTUNATELY NOT ALL OF THESE DEVICES ARE:

Safe

Compliant

Used by their rightful owners

Device counterfeiting costs the industry about **US$50 billion in revenue each year**, and also heavily impacts the **handset taxes collected by governments** in many countries. Furthermore, **non-compliant devices threaten the very integrity and security of telecom networks.**

THIS EXPLAINS WHY THE INDUSTRY AND THE GOVERNMENTS ARE SO EAGER to improve their oversight of the handset population.

ENFORCING HANDSET POPULATION COMPLIANCE AND SECURITY WITH VISIO DEVICE

Visio Device is an advanced solution that fully **addresses the need for device traceability and identification** in the mobile ecosystem of any country.

SPECIFICALLY DESIGNED AND INTENDED FOR:

Governments

Regulators

National security authorities

this unique system consists of a **centralized device identification registry** that enables real-time control over the **whole handset population of your country**.

Visio Device allows the regulator to **optimize collaboration with the industry** to **better fight counterfeiting** and other device-related issues, while at the same time **providing the authorities with invaluable data** on the whole **handset population**.

VISIO DEVICE TRACK RECORD

Implemented in **several countries**, Visio Device has brought over

100 **million devices**

into compliance from 2013 to 2019, thus improving network security.
