Transparency and reporting issues in telecoms

The more regulators know about telecoms in their country, the more effective they are in regulating this vital sector.

However, this knowledge cannot be based only on partial reports from the industry and mere statements from the operators.

Worldwide, nearly US$33 billion are lost every year as a result of telecom fraud, according to the European Cybercrime Centre. For governments, this means billions of dollars in lost tax revenue.

AN OVERALL LACK OF TRANSPARENCY CREATES A FERTILE GROUND FOR FRAUD and prevents governments and regulators from knowing what is really going on in the sector.

THE DIGITAL CORNERSTONE OF TELECOM REGULATION AND REVENUE ASSURANCE

Visio Telcom is a powerful digital solution with live dashboards that revolutionizes the way governments and regulators oversee the telecom industry.

In addition to full telecom traffic metrics, Visio Telcom allows you to collect and mine telecom data for various purposes, including:

Criminal investigations

National security operations

Billing of telecom-specific regulatory fees and levies

Market surveillance

VISIO TELCOM ALSO **INCLUDES AN AUTOMATED DETECTOR AND TRACKER** OF INTERNATIONAL **TRAFFIC-RELATED FRAUD**.

VISIO TELCOM TRACK RECORD

The Visio Telcom technologies have been implemented in

12 countries which have been able to secure more than

US$2.5 B

IN REVENUE through the automated control of international voice traffic alone.

The solution also enabled the authorities to reduce bypass fraud by up to

99%

while fostering a more transparent, compliant and safer telecom ecosystem for all stakeholders.
